

TOSYALI Metalurji

ENERGY POLICY

As Tosyali Metalurji Sanayi A.Ş., we aim to reduce our energy costs by managing our energy use and consumption effectively, increase the awareness of our employees and stakeholders regarding energy efficiency, and promote the long-term environmental sustainability of our operations. To this end, we commit to:

- Improving our energy performance by 10% within 4 years
- Continuously improving energy performance and the energy management system
- Providing the necessary knowledge and resources to achieve our objectives and energy targets
- Complying with applicable legal and other requirements related to energy efficiency, energy use, and energy consumption

In addition, we support the following points:

- Designing energy-efficient systems by considering energy performance improvements in the design and modification of facilities, equipment, systems, and processes
- Purchasing energy-efficient equipment, products, systems, and services
- Increasing the use of renewable energy sources
- Reducing greenhouse gas emissions through energy efficiency
- Promoting the use of energy-efficient technologies
