

## ENERGY POLICY

As TOSYALI Metalurji Sanayi A.Ş. , we aim to effectively manage our energy use and consumption to reduce our energy costs , to increase the awareness of our employees and stakeholders regarding energy efficiency , and to promote the long-term environmental sustainability of our activities, and we commit to the following;

- Improving our energy performance by 10% in 4 years
- Continuous improvement of energy performance and the energy management system
- Provision of information and necessary resources for the realization of goals and energy targets
- Compliance with applicable legal and other requirements regarding energy efficiency, energy use, and energy consumption

In addition, we support the following points:

- Performing energy-efficient design by considering energy performance improvements in the design and modification of facilities, equipment, systems, and processes
- Purchasing energy-efficient equipment, products, systems, and services
- Increasing the use of renewable energy sources
- Reducing greenhouse gas emissions through energy efficiency
- The use of energy-efficient technology
